

GENERAL OBSERVATION ON SSA.

1. Amount sanctioned for building grant should be uniform. It was observed that even in the same year, the receipt of Building grant is different in different schools. It is important to maintain uniformity in sanctioning of building grant for all schools depending on the revised amount from year to year.
2. Supply of books should be a week before the school opens i.e. in the first week of February every year. Every year the books are supplied 2 – 3 months after re-opening of the schools, sometimes even upto the middle of the year.
3. School uniform should be issued before the school opens.
4. Maintenance Grant should be regular so as to enable the schools to carry out maintenance and repair works regularly.
5. Some schools received School Grant in the form of money while some got it in the form of materials like water filters, dustbins, etc. In fact, sanctioning of school grant should be uniform for all schools whether given in the form of money or school materials.

SUGGESTION:

The above observations need to be considered by Project Director, SSA for ensuring effective implementation of the scheme.
