31. Problems:

- There is an urgent need for repairs the Building. The building was constructed from 18.4.2011 – 8.7.2011. Cracks appeared in the walls of the building since an earthquake in 2014, posing a serious safety hazard. Moreover, the window panes are broken, and as such water gets into the room during rains and the charts and pictures get ripped off during strong winds. A new building for kitchen-cum storage has been constructed, but it was informed that there is no provision for repairing the old building.
- The AWW expressed the need for a second AWC in the village as the number of children under its coverage is high

31. Problems:

- The Village population is 318 Nos. (153 Male, 166 female). The AWW expressed the need for the AWC to have a helper. As of yet, the AWW is managing the AWC alone.
- Take home ration is distributed in doubled portions, once in two weeks as the AWW is working alone and cannot cover all the beneficiaries in two weeks

3. The AWC building was constructed in 2020, and is located at the roadside. As such there is a need for a fence around the Centre as a safety precaution.
4. The AWW expressed the need for salary to be increased as the workload is heavy.
5. The Kitchen garden is located a considerable distance from the AWC as there is less space. It was informed that a small kitchen box garden at the Centre itself is being proposed but is yet to be built.
6. The AWW informed that although the children eat most of the food prepared at the AWC, they are not fond of the Rice based blended mix and only eat it after much coaxing.

Job Training Course for Anganwadi Workers	✓	
Refresher for Anganwadi Workers	✓	
Orientation for Helpers	✓	
Refresher for Helpers	✓	

31. Problems:

- Road connectivity near the AWC is poor and as such the supplier drops of food supply at the mainroad about half a kilometer away from the AWC, and has to be carried by the AWW and helper themselves
- The Growth Monitoring Chart is maintained but the Growth Register has not been maintained as the information is directly uploaded in the POSHAN tracker. However, as internet connectivity for uploading the same is poor in the area and The AWW has to seek spots with better connectivity for uploading the data
- The AWW expressed the need for extension of the AWC building.
- Activity/Working book is available and used by children, however, the Assessment Card is not available.
- Record of the number of beneficiaries for 2019-20 and 2020-21 is not available

31. Problems:

The building is very old and repairs were done by the locality in 2021. It was informed that an extension to the building amounting to Rs. 1,00,000/- has been sanctioned and construction will be undertaken soon. However, the main building itself is in need of repairs too as water and wind enters from the gap between the roof and wall.

Job Training Course for Anganwadi Workers	✓	
Refresher for Anganwadi Workers	✓	
Orientation for Helpers	✓	
Refresher for Helpers	✓	

31. Problems:

- The building was constructed in 2008 and is in need of repair.
- Upgradation of AWC building is done by constructing a new Store room/kitchen and dismantling the partition wall of the old kitchen, so as to expand the size of the pre-school room. The new Store room/kitchen in Wahsynon I AWC was completed in 2021, however, the wall of the old kitchen has not been dismantled and thus the pre-school room is the same size as before upgradation.
- Activity/Working Book is available and used by the children but Curriculum and Assessment Card is not available.

INTEGRATED CHILD DEVELOPMENT SERVICES (ICDS)

1. Date of inspection: 9.2.2022
2. Name of the accompanying officers/staff:
 1. Smt B Nongtraw, RO, DPIE

31. Problems:

1. The building was constructed in February 2021. Water is not available at the AWC. It is collected by the AWW and helper from the nearby SSA School
2. The AWW expressed the need for their salary to be increased as their workload is heavy.
