Refresher for Helpers?	

<p>Mention the Problems faced:</p>	<ol style="list-style-type: none"> 1. The village has a population of 535 (270 male, 265 female). However, the Centre is still a Mini Anganwadi Centre (Uncover: below 150, Mini AWC: 150-300, AWC: 300 above). It has been proposed to upgrade the Centre into an Anganwadi Centre. 2. Data is uploaded in the POSHAN Tracker, however the App is non-functional at present. Moreover, the App is English-based which makes it difficult for the AWW to understand. Earlier ICDS Common Application Software. 3. The building was constructed in 2020 under convergence with MGNREGS. A small ramp has been made from the verandah to the pre-school door. However, the floor of the ramp is very smooth which makes new beneficiaries who are unfamiliar with the building, slip and fall. 4. The AWC does not have water connection

Mention the Problems faced:	<ol style="list-style-type: none"> 1. The AWC building was constructed in 2000 (approx) and is need of repair. Water leaks in through the chimney during rain. 2. There is no water connection at the AWC. Water is collected from the community water tap. 3. There are no pre-school students, as all children under the AWC are enrolled in formal school. ECCE is given once a month to PM/NM and beneficiaries' mothers. 4. A proper path leading to the toilet needs to be made. 5. Data is uploaded in the POSHAN Tracker, however the App has been non-functional since 2021. Moreover, the App is English-based which makes it difficult for the AWW to understand.

Refresher for Helpers?	Yes
<p>Mention the Problems faced:</p>	<ol style="list-style-type: none"> 1. The AWC building is of Prefabricated Construction. The building is spacious and has many rooms, however, the kitchen are does not have a chimney. As the AWC does not have LPG connection, food is cooked in the AWH's house with firewood. 2. There is a room designated as a toilet, but no toilet facilities have been installed in it. 3. There is no water connection at the AWC. Water is collected from the local water spring about 10 minutes away. 4. The building leaks during rain 5. Pre-school is given at the AWC but children do not attend regularly. However, all children attend formal school 6. Kitchen garden has been constructed under MGNREGS, but it has not been handed over to the AWC as yet 7. Data is uploaded in the POSHAN Tracker, however the App is non-functional at present. Moreover, the App is English-based which makes it difficult for the AWW to understand.

<p>Mention the Problems faced:</p>	<ol style="list-style-type: none"> 1. The building is very old and is in need of repair. There is also a need for a larger building as it gets congested during pre-school classes. 2. The whole village faces water scarcity in winter and spring. Water is collected from community water tap. Hot cooked meal is cooked in the AWH's house. Water Tank is available, but it is old and broken down and water cannot be stored in it. 3. A toilet was constructed at the same time the AWC building was constructed, but it is in need of repair. At present, the toilet of the nearby School 4. The AWC is situated near a Lower Primary school (Kynshi Govt LP School). As such, many children between 3-6 years old, whose older siblings attend the above school, come along with them to this AWC for pre-school education. As many as 16 children under the coverage of other AWCs (Mawtihjrong, Bangla AWC, etc) attend pre-school in this AWC. 5. Data is uploaded in the POSHAN Tracker, however the App has been non-functional since 2021. Moreover, the App is English-based which makes it difficult for the AWW to understand.
